

**Ultra pure water system OmniaLabED+****Stakpure GmbH****Ultra pure water system OmniaLabED+**

For pure water and ultra pure water Type I + II.

Delivers the complete laboratory pure water and ultra-pure water supply. The system complies with international water standards such as ASTM, ISO 3696 and CLSI. The economy of it is maximized by the inclusion of a continuously self-regenerating electrodeionizer. Further to this, each OmniaLabED+-system holds 100 litres of pure water type II ready for withdrawal in a storage tank that is equipped with quality recirculation. The flexible positioning of the purification modules enables OmniaLabED+ to be supplied as a tower-unit (mobile on castors) or, to save space, for fitting in a base cabinet. OmniaLabED+ is exactly right as pure water supplier to autoclaves, laboratory washing machines and the dispensing of type I ultra pure water for analytical and bioscience applications.
