

Microbiological monitoring of water: MBS I system and membranes

Microbiological monitoring of water: MBS I system and membranes

The MBS I filtration system is designed for laboratories that handle high numbers of samples for microbiological quality control. It consists of a membrane dispenser, a funnel dispenser, and a 2-place filter AS220 manifold.

AS220 Filtration Manifold and Filtration funnels AS220 is a two-place stainless-steel filtration manifold, which can be joined together (maximum of 3 manifolds). This simple manifold can be used with 47mm or 50mm filtration membranes.

- Waste reduction - because PP funnels can be autoclaved up to 50 times
- Time saving - No need to flame in between filtrations
- Easy handling
- Cost saving - 20 PP funnels are enough for 1000 analyses
- Reduces cross-contamination

Code	Description	Packaging
LLG07608012	Microbiological monitoring of water: MBS I system and membranes, Autoclaving bags	20 pz.
LLG07616566	Microbiological monitoring of water: MBS I system and membranes, Funnels 100 ml, PP, autoclavable	20 pz.
LLG06801571	Microbiological monitoring of water: MBS I system and membranes, Funnels 350 ml, PP, autoclavable	20 pz.
LLG06225967	Microbiological monitoring of water: MBS I system and membranes, Membran-Butler manual	1 pz.
