

**Emptying device, stainless steel****Bürkle****Emptying device, stainless steel**

Emptying zone samplers were often a matter of patience and a steady hand. Now it's easier and faster with Bürkle's emptying device. Just lay the zone sampler onto the stainless steel stand, adjust the funnels along the sample chambers, and, after turning the sampler, the media will directly flow into the containers below. Quality materials ensure that the emptying device is autoclavable.
