PRODUCTION

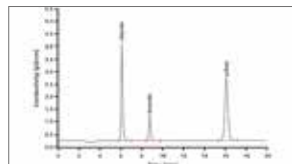

QUALITY

The proximity and experience of our Quality, Production and Logistics teams enable us to work with you to find the most suitable solution and make CARLO ERBA Reagents your **partner in choice**.

SPECIFIC PURITY

According to your requirements CARLO ERBA Reagents can work on the purity of its regular products :

- Batch selection
- Distillation
- Purification
- New source
- Impurities identification

OUT-SOURCING SERVICES

CUSTOM MIXTURES

CARLO ERBA Reagents can produce for you all kind of solutions or mixtures for various applications from 2.5L to several tons. This service allows you to save time, to reduce risks associated with the preparation of these solutions, and to receive a record label and safety data conform to current legislation.

- Specific solution mixtures (organic or aqueous)
- Buffered, acidified phases
- Analytical preparative and mobile phases
- Reagents for biotechnology
- Titrated solutions
- Reagents for on-line analysers like TOCmetres or silicemetres
- Standards for AAS, ICP, ICP-MS mono or multi-elements
-

PURIFICATION

CARLO ERBA Reagents provides expertise with over 170 years of experience in the purification of your chemical products, custom recycling of your high purity solvents, grinding for powder.

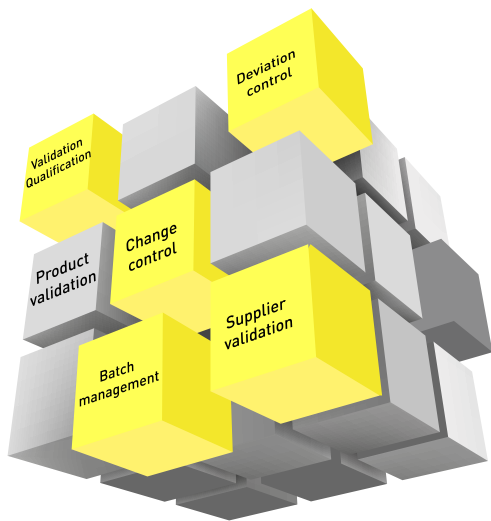

- An initial technical study to validate project feasibility and establish your quotation is done.
- A pre-production trial is then carried out.
- Your products are received in drums, reusable stainless steel drums or disposable containers.
- They are purified or recycled according to your specifications and dispatched in the packaging of your choice, accompanied by their certificate of analysis.

QUALITY ASSURANCE

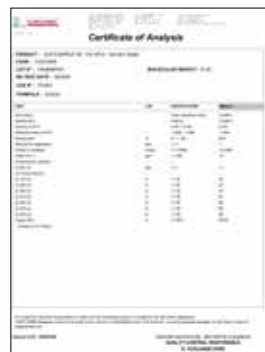

Our quality assurance system is based on risk management of technical systems and production sites, qualification of facilities adapted to our business, process control, cleaning procedures and analytical methods.

Independent of the production, the quality department manages the documentation, the control of the recordings, the traceability, the internal audits, the change control, the periodic monitoring of the indicators and the continuous improvement.

SPECIFIC QC TESTS

With its extensive knowhow, the CARLO ERBA Reagents Quality Control team can not only manage and deliver the required tests needed for your product but also follow the requirements of your own test laboratory.

CERTIFICATIONS

In order to always be in tune with the needs of the Pharmaceutical Industry market and to provide the best service from a quality point of view, we have been inspected and received the **ANSM** certification for excipients for our 2 production sites.

CUSTOM PACKAGING

Produced regularly or following a custom request, we pack your chemicals in the container of your choice and then test it in accordance with the requirements of our quality system.

- Bottle, barrels, drums, bucket with total opening, reusable container in polypropylene, stainless steel, from a few millilitres or milligrams to several tons.
- Inorganic or organic products, solid or liquid
- Custom labelled, preweighing, pre-proportioning.

SHUTTLE SERVICE

Stainless steel returnable containers to optimize solvent quality and the management of packaging waste

- Improved safety

- Efficient logistic

- Quality preserved

- Environmental impact

DELIVERIES IN LARGE VOLUMES

The solvents you used in large quantities can be delivered in IBC and tankers from 500 to 30 000L. The product type and usage determine the type of IBC of the material.

Such deliveries will include :

- Certificate of analysis of the container
- Representative sample delivered with the IBC under request
- Computerized tracing of the maintenance and transport
- Full traceability of the product

CARLO ERBA Reagents

Your partner in choice for laboratory and industry

With dedication, competence and experience, CARLO ERBA Reagents strives to be the right "partner in choice" offering products of certified quality to professionals involved with Research, Healthcare and Industry.
